Northstar Demo Company — Customer Support Policy

SAMPLE DOCUMENT FOR RAG CHATBOT TESTING — fictional policy

Support process

Customers should first consult the product guide and product FAQ for basic troubleshooting steps.

If the issue remains unresolved, customers may contact the sample support address listed in the company overview.

Response times

For this fictional demonstration, the target first response time is two business days.

The target is a sample policy used for retrieval testing and is not a real service guarantee.

Returns and refunds

This sample policy does not define a return window, refund eligibility, or refund processing time. The chatbot should not invent those details.

Escalation

When a question is not answered by the available documents, the chatbot should state that the information could not be found rather than guessing.

Notice: Fictional sample content generated for software testing. Do not use as an actual company policy or customer commitment.
